RIGGING SIGNAGE/STRUCTURE GUIDELINES			
<p>All signage information including the completed Exhibitor Rigging form, sign weight, dimensions and pictures/layouts need to be emailed to broadmoor@inspiresolutions.com at least fourteen days prior to event for proper scheduling. Any rigging order received after the fourteen day deadline will be charged an additional \$800.00 rescheduling fee.</p> <ul style="list-style-type: none"> Rigging plots must contain all flown equipment in addition to a reflective ceiling plan with hang-points and accurate weights. If the objects are overweight from the last submitted Document, INSPIRE will recalculate design and charge for additional rigging equipment or Inspire can refuse to hang equipment for safety reasons. Any installation of equipment to ceiling or supported structure of the facility must be made by INSPIRE. All structures/signage will be subject to inspection and approval by INSPIRE riggers in room before installation. All flown signs/structures must have an approved (load rated) harness or INSPIRE will build one for an additional cost. Signs with a closed top or bottom (fabric or mesh panel) will not be hung under any circumstances. It is strongly suggested that INSPIRE create all points and all required rigging for the exhibitor prior to the booth load in and assembly. If assembly is done prior to rigging, then by signing below you are waving INSPIRE of any damage contents or materials. In addition, INSPIRE is not liable for any additional labor incurred. Exhibitor representative must be present at the time of requested installation and dismantle.
